SECTION 1: AIMS AND IMPLEMENTATION OF THE 12 SITE REGENERATION PROGRAMME

Background
The Equality Act 2010 places a ‘General Duty’ on all public bodies to have ‘due regard’ to:

- Eliminating discrimination, harassment and victimisation and any other conduct prohibited under the Act
- Advancing equality of opportunity between those with ‘protected characteristics’ and those without them
- Fostering good relations between those with ‘protected characteristics’ and those without them.

The Council also has a ‘Specific Duty’ to publish information about people affected by our policies and practices and decisions. This Equality Impact Assessment provides evidence for meeting the Council’s commitment to equality, social cohesion and the responsibilities outlined above.

Where relevant within the programme If negotiation of the acquisition of land by private treaty fails the Council will have to consider the use of compulsory acquisition powers. If they are necessary, the Council should be satisfied that there is a compelling case in the public interest and that there is sufficient justification for interfering with human rights of those with an interest in the land affected. In this respect the Human Rights Act 1998 incorporates certain provisions of the European Convention on Human Rights, namely:

- **Article 1** – the right of everyone to peaceful enjoyment of possessions. No one can be deprived of possessions except in the public interest and subject to the relevant national and international laws.
- **Article 8** – private and family life, home and correspondence. No public authority can interfere with these rights except if it is in accordance with the law and is necessary in the interests of national security, public safety or the economic well-being of a country.
- **Article 14** – the right to enjoy rights and freedoms in the Convention free from discrimination on any ground such as sex, race, colour, language, religion, political or other opinion, or national or social origin.

In the case of each of these articles, the Council should be conscious of the need to strike a balance between the rights of the individual and the interests of the public. The Council may decide that, in the light of the significant public benefit which would arise from the proposed development, the use of compulsory purchase powers is necessary and proportionate taking into account the availability of compensation. In particular, the Council may consider that the CPO would not constitute any unlawful interference with individual
property rights.

**Identifying the aims of the Programme**

The overall objective of the 12 Site Regeneration Programme is to broaden and enhance the range, quality and quantity of housing across all tenures for existing and new residents, whilst also supporting the provision of facilities and services necessary to support growing communities.

The Council has established objectives for the regeneration project that are set out below:

- To contribute to meeting the wider housing needs of Havering through the regeneration and transformation of the Council’s existing stock for predominantly residential use.
- To provide a choice of good quality housing for people at all stages of life, increasing tenure diversity through affordable rent, shared ownership, private rent, market sale and extra care sheltered housing.
- To deliver high quality residential led development that is commercially viable and generates receipts for cross subsidy to ensure the programme is sustainable.
- To achieve development returns, income and/or a range of secure revenue streams for the Council through re-provision of all Housing Revenue Account (HRA) stock lost through redevelopment with new HRA stock matching the existing tenure.
- Where viability permits, the developments should also aim to deliver additional HRA rented units to the level of existing stock on sites previously purchased under the Right to Buy scheme.
- Where viability permits, the developments should also aim to deliver additional affordable housing being up to 30% of all additional units above existing all tenure stock levels, thereby achieving over 40% affordable housing across the 12 sites. This additional affordable housing target tenure split to be equal numbers of HRA rented and shared ownership dwellings.
- Help mitigate the homelessness pressures in the General Fund by providing increased affordable housing numbers.
- Improve the viability within the Asset Management Strategy by reducing the cost of maintaining existing poor viability buildings.
- Land is expected to remain in Council ownership except any freehold properties built for outright sale.

Where tenants and leaseholders wish to move back to a site, and there is suitable accommodation to meet their needs, they will be able to do so.
Why does the Council need to undertake an Equalities Impact Assessment?

The 12 Site Regeneration Programme is intended to benefit residents of all ages and backgrounds, regardless of any disabilities, impairments or socio-economic status. This Equalities Impact Assessment (EIA) considers the affects that this regeneration programme could have on households living in sheltered accommodation properties owned or managed by the Council and seeks to identify and mitigate disproportionate disadvantage that may arise for Council tenants that identify with any of the protected groups recognised by equality legislation. The Council, recognises that residents living in sheltered housing have specific needs that do not always correlate to those living in general needs properties.

This EIA recognises that residents affected by the Regeneration Programme all have legitimate needs and expectations. As such, general principles apply across all affected groups, and include:

- Keeping residents fully informed about issues that affect them
- Giving them the opportunity to express their views and that these are taken into account
- Providing appropriate support, including advice, assistance and financial compensation.

Regeneration is an economically viable opportunity to bring current sheltered housing schemes up to modern day requirements and expectations. With many units within the Council’s sheltered housing schemes’ left vacant and therefore not attracting a rental income, regeneration will mitigate the adverse impact on the Housing Revenue Account (HRA) at a time of increasing financial pressure.

The Council runs approximately 800 units across 19 housing schemes for older persons housing, with the vast majority being the Council’s own sheltered housing accommodation. Following the Older Person’s Housing Review in 2016, the Council’s sheltered housing accommodation was deemed no longer fit for purpose. Specifically, the review conveyed:

- a projected surplus of Affordable sheltered schemes within the borough and deficit in sheltered/retirement housing for lease and sale;
- a deficit of enhanced and extra care housing of all tenures; and
- a recommendation to develop additional extra care and/or Retirement Village Schemes

The Regeneration Programme seeks to address the Older Person’s Housing Review and will deliver sheltered and extra care housing which reduces isolation and supports and promotes independence, health and well-being. Investment in the right type of sheltered housing will also provide the Council with a sustainable way to provide support for older people.
## The Proposed Regeneration of Older Persons' Housing

<table>

<tbody>
<tr>
<td>Delderfield House</td>
<td>To build 30 new mixed tenure general needs homes.</td>
</tr>
<tr>
<td>Maygreen Crescent/Park Lane</td>
<td>This site is part of the 200 new mixed tenure homes proposed for the Maygreen Crescent and Park Lane Estate</td>
</tr>
<tr>
<td>Queen Street</td>
<td>This site is part of the 1,100 new mixed tenure homes on the Waterloo Estate.</td>
</tr>
<tr>
<td>Dell Court, Ravenscourt Grove</td>
<td>The proposal is to rebuild the Dell Court block, providing up to 40 flats for older persons over the age of 55 years and re-providing some communal facilities for the remaining sheltered accommodation. The flats will be targeted at persons over the age of 55 currently under occupying family sized council housing in a similar way to the various bungalow developments. These new units would not be classed as sheltered.</td>
</tr>
<tr>
<td>Ravenscourt, Ravenscourt Grove Brunswick Court</td>
<td>To be retained</td>
</tr>
<tr>
<td>Royal Jubilee Court</td>
<td>To replace the current provision with an Older Persons’ village which will include new sheltered housing, extra care sheltered housing and some dementia care sheltered housing accommodation. There will also be some low cost home ownership and sheltered housing for sale on the site. The proposal is to build 150 new mixed tenure homes as an Older Persons’ village.</td>
</tr>
<tr>
<td>Solar, Serena and Sunrise Courts</td>
<td>To develop new sheltered housing, extra care sheltered housing and some dementia care sheltered accommodation, creating 150 new mixed tenure homes developed as an older persons’ village. There will be some low cost home ownership, sheltered housing and some dementia care sheltered housing within the new village.</td>
</tr>
</tbody>
</table>

*All other Council-owned sheltered schemes are outside of the scope of this EIA*
Due to the scale and longevity of the regeneration programme, an EIA is required to assess the impact that the programme activities will have on residents in and around the sheltered schemes.

In the short term the disruption caused by the programme will have a negative impact on households. To mitigate this, the Council will provide a comprehensive package of rehousing assistance and support to minimise the disturbance experienced by residents including compensation which will be detailed in the Council's Local Lettings Plan. There will be an enhanced package of assistance available for all residents including help with removals, disconnection and reconnection of services etc. Throughout the moving process and wherever possible, the Council will minimise the number of times that people need to move (with the majority of tenants only having to move once). More vulnerable residents will be prioritised for one move only.

The Council recognises that the Regeneration Programme will impact those living in the affected sheltered housing schemes. Therefore, in addition to the comprehensive meetings with directly affected residents we are holding a series of public meetings with people living near the sites in order to provide information and answer any concerns they may have. More details on how we plan to communicate with stakeholders can be found in the Regeneration Consultation and Communication Strategy.

The temporary adverse effects of the 12 Site Regeneration Programme will be outweighed by the widespread betterment associated with housing regeneration such as new, energy efficient homes in a better designed environment.

**Who are the stakeholders affected by this proposal?**

The programme will affect residents at the following sheltered housing schemes:

1. Brunswick Court sheltered housing scheme
2. Delderfield House sheltered housing scheme
3. Queen Street sheltered housing scheme
4. Maygreen Crescent and Park Lane sheltered housing scheme
5. Solar, Serena & Sunrise sheltered housing scheme
6. Dell Court sheltered housing scheme
7. Royal Jubilee Court sheltered housing scheme

For further information please contact Corporate Diversity Advisor 01708 431874
Within these sites, the following resident groups are affected:

- Council general needs tenants
- Home owners (Residential leaseholders, Non-residential leaseholders and Freeholders)
- Private tenants

The programme also affects other stakeholders such as:

- Families and carers of residents
- Existing housing register applicants seeking sheltered housing
- The wider residential community in the borough
- Havering Council Officers (staff in charge of operations) including Councillors and members of the Council
- Housing Associations and affordable housing providers and other partner agencies
- Businesses or community services next to or surrounding a site regeneration

How does the regeneration of sheltered housing meet the Council’s current priorities?

In January 2017, Havering launched its new vision for the Borough ‘Havering – Making a Greater London’. The proposals to redevelop the Council’s sheltered accommodation and extra care provision for older people addresses three of the Council’s objectives:

1. **Communities making Havering** - supporting families and communities to look after themselves and each other, with a particular emphasis on our most vulnerable residents. The redevelopment of our sheltered accommodation and extra care scheme allows Housing Services to trial and implement a range of solutions which can tackle social isolation and improve well-being among our more vulnerable residents. Redesigning our older person accommodation provision within the Borough and piloting/rolling out community hubs will reduce social isolation for our older residents of all tenure types.

2. **Places making Havering** – delivering high quality homes which will improve the health and well-being of our residents. Aside from the redevelopment of our more unsuitable sheltered schemes, improvements will be made to those sheltered blocks that will remain and we will be investing in our existing general needs council stock.

3. **Opportunities making Havering** – the Council are committed to providing first-class business opportunities by supporting the commercial development of companies within the Borough; to ensure sustainable economic growth that generates local wealth and opportunities, high-quality skills and careers. The procurement of a joint venture partner to deliver the 12 Site Regeneration
programme will require a commitment from any potential investment partner to add social value their offering. This will include an undertaking that they will provide employment, skills and training opportunities for local people.

One of the key principles resulting from the 2015 review of older persons’ housing in Havering is that all schemes for older residents must be modern, safe and accessible. This will also improve cost efficiency and facilitate greater choice and control for service users. The regeneration of sheltered housing makes a positive contribution to our obligations and duties under the Care Act 2014; to prevent, reduce or delay the need for care and support for all local people.

**Which equality objective(s) are relevant to this proposal**

- Understanding the needs of Havering’s diverse community
- Improving life chances for all, particularly for the most vulnerable members of the community
- Removing barriers to accessing the Council
- Promoting community relations and civic pride

**Are there any current strategies/policies that are relevant to this Proposal?**

- Homelessness Act 2002
- Housing Act 1985
- Housing Act 1996
- Housing Act 2004
- Housing and Regeneration Act 2008
- Human Rights Act 1998
- Land Compensation Act 1973
- Planning and Compulsory Purchase Act 2004
- Town and Country Planning Act 1990
- Draft London Housing Strategy 2017
- Regeneration Local Lettings Plan
- Regeneration Decant Policy and Possessions Procedure

**Implementation of the Regeneration of Older Persons Housing**

The Regeneration Programme will seek to address the recommendations and proposals arising from the Older Persons’ Housing Review. The programme will be led by the Housing Regeneration Board. All project documentation can be found at [https://www.havering.gov.uk/homepage/78/building_new_homes_for_havering](https://www.havering.gov.uk/homepage/78/building_new_homes_for_havering)

**如何向员工和服务使用者传达再生提案？**

理事会的其中一个关键承诺是确保有‘持续咨询’与居民。有一个明确的沟通计划，以促进居民的意识和参与，贯穿项目的整个生命周期。理事会承诺在整个开发期间，要定期、公开和诚实的沟通。这进一步在计划的咨询和沟通策略中解释。

咨询过程的每个阶段都通过一系列沟通渠道进行反馈收集：

1. 定期简报和咨询会议，每个再生点的会议。
2. 专为每个项目定期更新再生提案的专刊，附有常见问题解答。
3. 一对一与居民讨论住房需求和搬迁要求。
4. 为普通需要住房的发展设置专门网页，每个方案有其自己的网页，可以访问
   www.havering.gov.uk/HousingRegeneration
5. 定期的At the Heart杂志，可在线和纸质版本发布，包括特别的特别版。
6. 为住房服务人员、经济发展和监管服务部门的简报。
7. 积极的新闻报导Romford Recorder和Havering Yellow Advertiser，包括反馈机制。
8. 更新发布在社交媒体上，包括Facebook和Twitter。

一个专门的住房再生项目团队，已在理事会的住房服务内设立，以一对一的方式与居民合作，确保住宿和支援需求得到解决。他们将与理事会的其他服务和团队合作。再生工作坊，将高级管理层的代表，将处理所有需要升级的情况。

**信息缺口**

没有信息可量化的LGBT服务使用者在庇护所住宿。该提案对该群体有中立的影响。
Action needed

Residents have been continuously consulted with and the Council will continue to do so in order to identify and mitigate any disproportionate adverse impact to groups with protected characteristics that has resulted from the regeneration proposals.
SECTION 3
ASSESSMENT OF IMPACT

The following data and analysis relates to residents living in sheltered/extra care schemes for older people that are affected by the Regeneration proposals

Ethnicity

Diversity data of current residents indicates that the predominant ethnic group among residents within the affected sheltered and extra care schemes identified themselves as white British, making up currently 81% of residents. The next highest represented group among the sheltered and extra care schemes are the White Irish and the White other groups (respectively at 4% each), followed by the Black African and White Asian at 3% each. The other ethnic groups made up 1% or less respectively of the ethnic make-up of the affected sheltered schemes. This is reflective of the diversity currently across the Borough.

Source: Housing Services Diversity Report (December 2017)

There is no evidence to suggest that the proposals to redevelop the sheltered and extra care schemes will produce discriminatory effects on any protected characteristic within this strand. From the data collated from Housing Services Online Management System

For further information please contact Corporate Diversity Advisor 01708 431874
Of the 134 residents in all affected sheltered and extra care schemes, only 2 out of 134 residents (just over 1%), require a language interpreter as a requested service adjustment. This will be monitored throughout the consultation process. All residents will receive care and support during the redevelopment programmes in a culturally appropriate manner. Support plans and daily activities remain person-centred and are inclusive of meeting all ethnic diversity needs.

### Gender

Females represent a greater proportion of service users in all the affected sheltered schemes (58% female to 42% male residents). The general trend may reflect that women live longer in Havering. As age increases, the ratio of women to men in the older population of Havering increases. The life expectancy at age 65 years in Havering is 18.9 years for males and 21.6 years for females (Life expectancy at birth, 2001-2003 to 2012-2015; Office for National Statistics (ONS); Produced by Public Health Intelligence).

The gender split among residents in Havering’s sheltered accommodation and extra care schemes is weighted towards women. Women will therefore be more affected by the programme than men. All residents will be supported individually throughout the programme, to mitigate this.
Disability

The proposed redevelopment of our older persons’ housing will aim to meet the needs of those with a disability and ensure that accommodation is suitable and meets their needs, and that the regenerated schemes deliver modern, safe amenities in line with current design standards for disabled living. 95% of those currently living in sheltered accommodation have identified themselves as being disabled.

Moving existing tenants from their current homes will be disruptive to them, their families and carers. Some residents with close local and family ties and friendship groups in their current homes may find it upsetting to move. A full assessment will be carried out for each resident before they move. These assessments will be based on good practice guidelines on closing sheltered schemes and settling people into new accommodation. Residents will also have access to independent advocacy support which will provide tenants with support and reassurance they need.

Source: Mid-year population estimates 2015; Office of National Statistics (ONS)
The redevelopment of the affected schemes is about making a positive change and redesigning our sheltered housing offering. The redevelopment of these facilities will greatly improve the quality of our service provision. During this transformation process, the Council will ensure that the care needs of existing tenants will be met.

The Council will ensure that reasonable adjustments are made throughout this process. We will identify the needs and requirements of tenants during one to one meetings and support them in sourcing alternative accommodation, (should we need to decant tenants during the development), and assist them where it is necessary for them to choose new accommodation within our sheltered housing offering. We will help prepare tenants for a move or making a move to alternative accommodation. All residents’ next of kin will be involved in supporting residents to help them decide the best solution for each resident.

Source: Housing Services Diversity Report (December 2017)

62% of all residents in the affected Sheltered Schemes have a condition which will impact on their mobility.

Source: Housing Services Diversity Report (December 2017)

25% of the residents in all affected Sheltered Schemes have a declared sensory disability.
Age

Residents in the Borough are living longer and the average age when people move into sheltered housing has steadily risen. A better range of choices is needed to enable people to live fulfilling lives into older age.

The size of the 65+ population is projected to grow significantly in Havering over the next 15 years, driven mainly by life expectancy. The projected increase is likely to increase demand for social care in the Borough.

Projected percentage population change by age group since 2016, for 2021, 2026 and 2031

2015 Round Strategic Housing Land Availability Assessment (SHLAA)-Based Projections; Greater London Authority (GLA); Produced by Public Health Intelligence

Many residents are keen to engage in a wide range of activities and wish to engage actively with their local community. The largest age groups represented within all the affected sheltered housing schemes are those residents aged 65 – 74 and 75 -84 groups.
At present, there continues to be many older people remaining in general needs housing and living longer in that housing, meaning that the general needs housing stock is not being recycled for other families as quickly as it was in the past. The life expectancy for people living in Havering is 80.2 years (for males) and 83.9 years (for females) from birth. Life expectancy in Havering has been mostly higher than the average in England and has continued to increase over the last decade. This adds further pressure on the existing housing stock and compounds the shortage in the supply of general needs family housing available for younger households.

The redevelopment will provide older people with more choice and opportunities to maximise their independence within a supported housing scheme with care provided on site. This will enable people to retain independence while providing the appropriate level and type of support, enabling people to continue living their life in their own way having choice and control.

Given the correlation between ageing and a range of health conditions, it is worth emphasising that the regeneration project will provide improved & expanded housing options for older people by developing a range of models to include low-dependency accommodation and extra care housing.
Sexual Orientation

There is little or no evidence to suggest that there is an adverse impact on protected characteristic groups as a result of the Regeneration Programme. The most recent Diversity report for sheltered accommodation tenants affected by the Regeneration Programme does not provide an indication of diverse sexual orientation. We recognise that there is a potential deficit in the self-declaration of tenants who identify themselves as from the LGBT community. This may be attributable to tenants often being reluctant to disclose this information.

![Sexual Orientation Diagram](image)

Source: Housing Services Diversity Report (December 2017)

Any issues brought to our attention will be dealt with sensitively on a case by case basis. Housing Services will encourage tenants to declare any issues in terms of harassment, hate crime or domestic abuse which could impact on where we place a tenant on a temporary or permanent decant basis. We recognise that this is an elective process on the part of the resident and Housing Services will respect the confidence given to our officers when a resident discloses this information to use.

In the interim, officers supporting residents should consider specific questions relating to the tenants sexual orientation and how this might link to their housing options. As part of our continued commitment to increasing awareness of all diversity and cultural needs, we
provide ongoing training for staff, taking on good anti-discrimination practice. This serves to ensure that residents are placed in a sensitively in an appropriate setting which meets their needs.

**Religion/Belief**

It is thought that the proposals, in the main, will not have any impact on residents based on their religion, faith or beliefs. 

![Religion Pie Chart]

Source: Housing Services Diversity Report (December 2017)

The Regeneration Programme may affect residents that practice their religion by demolishing their place of worship or moving residents away from there. We are aware, that there may be residents within some of the sheltered housing schemes who may like to remain in the proximity of their current place of worship and may require closeness to culturally relevant shops and to their faith groups.

As part of continued communication with our stakeholders, we will work with residents and local faith groups to ensure that these links remain in place. Importantly, consideration will be given to ensure that the provision of prayer facilities and understanding of other belief systems is promoted within our schemes.
**Gender reassignment**

Our knowledge of residents who have undergone gender reassignment is extremely limited. In part, this may be attributable to residents not wishing to disclose this information.

Those that have undergone gender reassignment will be treated fairly and have equal access to support throughout the decanting and rehousing process. In the interim, officers supporting residents should consider specific questions relating to the tenants sexual orientation and how this might link to their housing options.

As part of our continued commitment to increasing awareness of all diversity and cultural needs, we provide ongoing training for staff, taking on good anti-discrimination practice. This serves to ensure that residents are placed in a sensitively in an appropriate setting which meets their needs.

Any issues or concerns brought to our attention will be dealt with sensitively on a case by case basis. Housing Services encourage residents to declare any issues in terms of harassment, hate crime or domestic abuse which could impact on where we place a resident on a temporary or permanent decant basis. We recognise that this is an elective process on the part of the resident and Housing Services will respect the confidence given to our officers when a resident choses to disclose this information to us.

**Pregnancy and maternity**

This is not a characteristic affecting residents at our sheltered or extra care schemes.

**Marriage and Civil Partnership**

From the most recent Diversity report, (December 2017), 15% of residents in the affected sheltered schemes are either married or co-habiting with a partner. 84% of residents in the affected sheltered schemes are single, widowed, divorced or separated. The status of 1% of residents is unknown.

It is thought that the marital or civil partnership status of residents will not impact on residents affected by the redevelopment of the Sheltered Schemes.
**Health Impact**

Sheltered housing provides a preventive service, reducing the need for more acute intervention later. Housing management and support services in sheltered housing is targeted to assist people to live an active and fulfilling life. The benefits can be seen in the tenancy sustainment, maintenance of independence, the prevention of accidents and poor health, and improvements to physical and mental health. Sheltered housing can prolong independence and self-care by providing a range of low level support services, and supporting people to access more intensive services as and when they need them.

We realise that residents who are settled in these affected schemes will be attached to their scheme and will be unhappy with the upheaval that the redevelopment or closure of their scheme may cause. We recognise that residents may find it difficult to adapt to change. The Council will place great care and attention to detail in order to minimise disruption. We will maintain continuity of service irrespective of a decommissioning decision.

We understand that residents from schemes facing closures will worry and this in turn could have an adverse impact on their health and well-being. To this end, we have published a local lettings plan which will affirm our offer to our residents affected by the closure or redevelopment of one of our housing schemes. In our meetings with residents we will describe in detail how the sensitive transfer and transition process, following accepted good practice, will mitigate any distress as is possible.

Transition plans are put in place for each resident and they will be supported before, during and after they move, when they are moved to another sheltered scheme.

By having well designed and affordable sheltered housing schemes, it will enable current residents to move from accommodation which is less than appropriate or suitable for their needs. Within these redeveloped schemes, we will no longer provide bedsits. All of these schemes will be fully accessible with the provision of lifts to all floors and ramps as required. Security will be greatly improved in all of the schemes. All accommodation will include the provision of light, adequate and modern communal facilities in each scheme.

We will forge stronger links to the local community and our intention is to build social capital and serve the wider community, with the potential to further strengthen the contribution to the local facilities available to local communities through the development of community hubs. According to Census 2011, about 32% (13,449) of the population are aged 65 years and above and live in one-person households. Almost half (48%) of all one person households in Havering are occupied by persons aged 65 years and over, which is the highest proportion in London according to the Census 2011 (Household Composition by Age), Office for National

For further information please contact Corporate Diversity Advisor 01708 431874
Statistics (ONS). Our sheltered schemes will provide organised social activities and opportunities during the day, which can promote lifelong learning, healthy living and active ageing. Aside from drawing in other older residents from outside of the scheme the aim is to become more inclusive of the wider older persons community within the borough, providing new opportunities to widen the social networks of scheme residents and to promote and build social cohesion.

**Socio Economic Factors**

Where applicable these have been highlighted within the assessment for each protected characteristic. In addition, the Council recognises the importance of maintaining social support networks which are often based on locality (neighbours, friends and family). The Local Lettings Plan’s (LLP) commitment to residents is that re-housing offers will be based on choice, given the re-housing options available. The aim will also be to move groups of vulnerable residents together where practicable, in order to maintain social networks and a sense of community). It is of course worth highlighting that residents can opt to return to the property location /area once the site has been regenerated, thus mitigating any long term social impacts.

It is recognised that many of our residents are on full or partial housing benefit or on low incomes. However, rent levels for new properties will be set at the appropriate level, according to Council policy and formula at the time. Service charges will be based on the level of service given at the scheme. The Council is not in a position to cap rents or service charges for the new properties, but will provide advice and support where residents are having difficulty paying their rent. This could include signposting to specialist debt advice agencies where appropriate. A person’s socio-economic status will not make them any less safe and secure in their homes than anyone else.

The LLP sets out the offer to Council tenants. Further information on home loss and disturbance payments, as well as other reasonable expenses, will be published in an additional information pack on the Regeneration Programme.

Given recent tragic events around fire safety in London council blocks, Havering will seek to ensure that all the regenerated sites adhere to the highest standards of fire safety and other health and safety standards, including compliance with current and future regulation. This will apply across all sites and tenure types, so whatever the person’s economic status, it will not make them any less secure in their homes than anyone else.
### Section 4: Measures to mitigate adverse impact

In this section you should list the specific actions that set out how you will address any negative equality impacts you have identified in this assessment.

<table>
<thead>
<tr>
<th>Protected characteristic</th>
<th>Identified negative impact</th>
<th>Action taken to mitigate impact*</th>
<th>Outcomes and monitoring**</th>
<th>Timescale</th>
<th>Lead officer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lesbian, Gay, Bisexual &amp; Transgender</td>
<td>Lack of data will lead to an adverse impact and identification of housing needs for residents</td>
<td>Collate information gathered from 1-2-1’s with residents and Housing Needs Assessments where a resident is willing to disclose information to Regeneration Team officers</td>
<td>Better understanding of needs of residents ensuring residents are placed in suitable accommodation.</td>
<td>Ongoing</td>
<td>Sheltered Housing Manager</td>
</tr>
<tr>
<td>Disability</td>
<td>Residents may be placed in accommodation which is not suitable for their needs</td>
<td>Ensure all Regeneration Team officers are aware of the constraints within each schemes buildings to ensure that residents are placed in an appropriate setting suitable for their needs.</td>
<td>Residents are placed in the right accommodation first time which is appropriate and provides the right level of support for their needs.</td>
<td>Ongoing</td>
<td>Sheltered Housing Manager</td>
</tr>
<tr>
<td>Ethnicity Disability (residents with a visual or hearing sensory impairment)</td>
<td>Unable to understand fully the effects the redevelopment may have on residents with these protected characteristics</td>
<td>Ensure the provision of information in appropriate formats where appropriate.</td>
<td>Residents are fully consulted and engaged with to enable them to make suitably informed decisions. Measured through a satisfaction survey on completion of move.</td>
<td>Ongoing</td>
<td>Sheltered Housing Manager/Community Engagement Team</td>
</tr>
<tr>
<td>All</td>
<td>Lack of awareness of diversity and cultural needs</td>
<td>Ongoing training for staff to raise and ensure awareness of diversity and cultural issues taking on good anti-discrimination practice</td>
<td>Cultural and diversity needs of residents are understood and residents are placed sensitively in an appropriate setting which meets their needs as practicably as possible.</td>
<td>Ongoing</td>
<td>Sheltered Housing Manager</td>
</tr>

</table>
SECTION 5: Monitoring and Review

In this section you should identify how frequently the EIA will be reviewed; the date for next review; and who will be reviewing it. Assessing the impact on equality is an ongoing process that does not end once a policy proposal strategy or review has been agreed or implemented. Your assessment will have helped you to anticipate and address the proposal’s potential impact on different groups. However, the actual impact of the proposal will only be known once it has been introduced. You may find that you need to revise the policy if unexpected negative impacts occur.

Reviewing a policy will involve using the experience gained through implementation to consider any possible adjustments. Issues to be considered include:

- How and when you will measure the impact of the policy?
- When will the policy be reviewed and what could trigger an early revision?
- Who will be responsible for monitoring and review?
- What type of information is needed for monitoring and when it will be analysed?
- How to engage stakeholders in implementation, monitoring and review?

It will only be possible to analyse the actual effect on different groups once the regeneration is underway and residents make their choices. If and when feedback or data indicate that a review may be required, it will be a decision made by the Regeneration Programme Board.
