Notes:
The updated Flood Map for Surface Water (uFMSW) shows the flooding that takes place from the 'surface runoff' generated by rainwater (including snow and other precipitation) which:
1) is on the surface of the ground (whether or not it is moving), and
2) has not yet entered a watercourse, drainage system or public sewer.
Notes:
Information provided by Thames Water indicates the total number of reports of flooding both internally and externally from sewers up to a 5% (1 in 20) annual chance event. This information includes all reports post 1997 and possibly before that date, where the local authority operated the contract on Thames Water’s behalf.
Key
- Borough Boundary
- Main Rivers
- Havering Critical Drainage Areas
- Flood Zone 3
- Flood Zone 2
- Hospitals
- Ambulance Stations
- Fire Stations
- Police Stations
- Schools and Colleges
- Community Centres
- Care Homes
