## **Appeal Decision**

Hearing held on 6 October 2015 Site visit made on 6 October 2015

## by P Willows BA DipUED MRTPI

an Inspector appointed by the Secretary of State for Communities and Local Government

Decision date: 30 October 2015

# Appeal Ref: APP/B5480/C/15/3004904 The land at Yard 3, Clockhouse Lane, Collier Row RM5 3PH

- The appeal is made under section 174 of the Town and Country Planning Act 1990 as amended by the Planning and Compensation Act 1991.
- The appeal is made by Mr Liaqat Ali against an enforcement notice issued by the Council
  of the London Borough of Havering.
- The Council's reference is ENF/10/14.
- The notice was issued on 14 January 2015.
- The breach of planning control as alleged in the notice is, 'Without planning permission, the erection of a boundary fence, adjacent to the public highway at Clockhouse Lane, Collier Row, in excess of 1 metre high and the construction of 4 buildings and structures as identified hatched black on the attached Plan 2'.
- The requirements of the notice are:
  - (i) Remove the four identified buildings/structures;
  - (ii) Reduce the height of the boundary fence which is adjacent to the public highway at Clockhouse Lane to 1 m high.
  - (iii) Restore the land to the condition prior to the construction of the buildings/structures.
- The period for compliance with the requirements is 6 months.
- The appeal is proceeding on the grounds set out in section 174(2)(a), (f) and (g) of the Town and Country Planning Act 1990 as amended.

#### **Decision**

- 1. The enforcement notice is corrected by:
  - the substitution of the plan annexed to this decision for Plan 2 attached to the enforcement notice;
  - the deletion of the postcode in section 2 (The Land Affected) and its replacement with 'RM5 2RR';
  - the deletion of Paragraph 3 (the Breach of Planning Control Alleged) and its replacement with, 'Without planning permission, the construction of the 3 buildings shown hatched on Plan 2';
  - the deletion of 'four' from Paragraph 5(i) and its replacement with 'three';
  - the deletion of Paragraphs 5(ii) and 5(iii) in their entirety.
- 2. Subject to these changes the appeal is dismissed and the enforcement notice is upheld, and planning permission is refused on the application deemed to have been made under section 177(5) of the 1990 Act as amended.

#### The notice

3. It is agreed that the notice does not accurately set out the unlawful development on the site on 2 counts. First, the Council now accepts that the fence has been in place for more than 4 years and is therefore immune from enforcement action. Second, one of the buildings has now been removed. In view of this, the Council asks that the notice be corrected, and has submitted a revised plan identifying the 3 buildings it now wishes to target. The appellant has confirmed that he would not be prejudiced as a result of the notice changing in this way. In view of this, and bearing in mind that the notice would not be more onerous as a result of the changes, no injustice would be caused. I will therefore correct the notice as suggested by the Council. I have also corrected the postcode for the site, which is wrong on the notice. The deemed planning application arising from the ground (a) appeal changes in accordance with the revised allegation.

## The appeal on ground (a)

#### Main Issues

- 4. The site falls within the Metropolitan Green Belt. The main issues are:
  - Whether the proposal is inappropriate development within the Green Belt for the purposes of the National Planning Policy Framework (the Framework) and development plan policy;
  - The effect of the development on the openness of the Green Belt and on the character and appearance of the area; and
  - Whether the harm by reason of inappropriateness, and any other harm, is clearly outweighed by other considerations, so as to amount to the very special circumstances necessary to justify the development.

## Planning policy

- 5. The development plan includes the London Plan and the Council's Core Strategy and Development Control Policies Development Plan Document (the 'DPD').
- 6. London Plan policies 7.4, 7.6 and 7.16 deal with local character, architecture and Green Belt respectively.
- 7. DPD Policy CP14 is concerned with the boundary of the Green Belt but does not assist in the determination of proposals. Policy DC45 deals with appropriate Development in the Green Belt but predates current national Green Belt policy, which limits the weight I give it. Policies CP17 and DC61 deal with design and urban design.
- 8. Policies DC 53 and DC55, which relate to noise and contaminated land, are not relevant to the issues raised in this appeal. The Council also refers to Policy W2 of the Joint Waste Development Plan Document, but accepted during the Hearing that this was not relevant.

#### Inappropriateness

9. It is common ground between the parties that, for the purposes of planning policy, this is inappropriate development in the Green Belt. I agree with that

view. Paragraph 89 of the Framework advises that, with a number of specified exceptions, the construction of new buildings in the Green Belt should be regarded as inappropriate. None of the exceptions apply in this case. The Framework advises at Paragraph 87 that inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances. I attach substantial weight to the harm arising due to the inappropriate nature of the development.

#### Openness

- 10.eThe site is occupied by businesses engaged in vehicle repair, vehicle storage,e car breaking and component recovery. The lawfulness of the use of the site ise agreed.e
- 11.eThere are 3 buildings that the amended notice now targets. 'Building 1' (usinge the Council's numbering) is the most substantial of these. It is a steel-framede building with metal cladding and a concrete floor. It is used as a workshop ande for storing parts and also contains 2 small offices. Buildings 2 and 3 aree crudely constructed using what appear to be scaffolding poles, planks of woode and metal sheeting. Both are principally used for storage. Indeed, Building 2e is little more than racking with a roof and side panels.e
- 12.eBe that as it may, the 3 buildings are significant structures and therefore erodee the openness of the site and the Green Belt, particularly when considerede cumulatively. While the other structures at the site, including the fencing,e have already compromised its openness, that does not alter my view thate further harm arises from the 3 structures targeted by the notice. The harm toe openness means that there is conflict with the Framework, which advises ate Paragraph 79 that openness is an essential characteristic of Green Belts.e

### Character and appearance

- 13.eThe buildings are seen in the context of the rest of the scrap yard. Thise includes other structures which I understand are now lawful and which are of ae comparable height to the appeal buildings. The fencing along the site frontagee is made up of metal sheets and gives the site a particularly poor appearance.e Thus, despite the poor appearance of Buildings 2 and 3 in particular, theire effect on the character of the site is essentially confined to increasing thee density of built form.e
- 14.eMoreover, I found views of the buildings to be very limited. Indeed, the onlye view I was able to obtain was through the open gateway; the fencing along thee site boundary prevented other views of the buildings from Clockhouse Lane.e
- 15.ePlainly, the buildings are not 'of the highest architectural quality', and to thate extent there is conflict with London Plan Policy 7.6. Nevertheless, for thee reasons I have outlined the harm to the character and appearance of the areae is negligible and the underlying aims of that policy, London Plan Policy 7.4 ande Core Strategy policies CP17 and DC61 are not compromised.e

#### Other considerations

16.eThe appellant's business 'ATK Autos' operates from Building 1. I understande that the business employs 7 full time and 3 part time workers. It also emergede during the Hearing that part of the site, including Building 2 and Building 3, aree sublet to other businesses. The appellant advised during the Hearing that hise

business could not continue without a building and was of the view that it would not be possible to find an alternative site. There would clearly also be a harmful effect on the business using the other buildings. The Framework supports business development, including in rural areas. I attach significant weight to the benefits of the businesses and the employment they provide.

- 17.eThe appellant argues that the site would not be materially different without thee buildings. The same parts of the site could continue to be lawfully used ine connection with the businesses and the buildings help give the site a moree ordered appearance. Any intensification of use of the site could result in ite having a denser, more harmful appearance, and it is particularly relevant thate there are no restrictions on the height to which items can be stored.e
- 18.eHowever, I have no clear indication that any more intensive use of the site ise likely if the notice is upheld. Indeed, the appellant's evidence that it would note be viable for his business to continue at the site without a building suggestse otherwise. Thus, while I have taken account of the fact that the current use ofe the site could lawfully continue without the buildings, their loss would bee unlikely to cause any further harm to the appearance of the site.e
- 19.eThe appellant says that he has improved the site by hard-surfacing it ande adding drainage. However, the appeal before me has no bearing on thosee matters and they do not weigh in favour of or against the development.e
- 20.eIt was suggested at the Hearing that the appearance of the site could bee improved with landscaping. Yet there is no land within the appellant's controle between the appeal site and Clockhouse Lane, which would be essential ine order to make any significant improvement to the appearance of the site usinge landscaping.e

#### Conclusion

21.eI have attached substantial weight to the harm arising due to the inappropriatee nature of the development and have also found harm in respect of thee openness of the Green Belt. Weighed against this are the business ande employment benefits of the development. Considering the case as a whole Ie find that the other considerations do not clearly outweigh the harm that I havee identified. Consequently, the very special circumstances necessary to justifye the development do not exist and the proposal is contrary to the Frameworke and London Plan Policy 7.16. Accordingly, the appeal on ground (a) fails.e

#### The appeal on ground (f)

- 22.eThe gist of the appellant's case is that the buildings could be reduced in height.e
- 23.eSection 173 of the Act indicates that there are two purposes which thee requirements of an enforcement notice can seek to achieve. The firste (s173(4)(a)) is to remedy the breach of planning control which has occurred.e The second (s173(4)(b)) is to remedy any injury to amenity which has beene caused by the breach. In this case the Council states that the purpose of thee notice is to remedy the breach of planning control under s173(4)(a). That ise consistent with the requirements of the notice. Since the breach of planninge control is the erection the buildings, it can only be remedied by requiring theme to be removed. Thus, the appellant's proposal would not meet the purpose ofe the notice.e

- 24.tThat said, the enforcement regime is intended to be remedial rather thant punitive. However, there are no details of the proposed alterations to thet buildings, which means that am unable to judge their visual effect or be suret that they would be feasible. In any event, while reducing the height of thet buildings would lessen their impact on openness, it would not alter the fact thatt they are inappropriate development in the Green Belt.t
- 25.tI conclude that the requirements of the notice are not excessive and that thet purpose of the notice would not be met by the appellant's proposal.t Accordingly, the appeal on ground (f) fails.t

## The appeal on ground (g)

- 26.tIt is argued in the appellant's statement that the 6 months specified in thet notice is inadequate and that a 12 month period should be substituted to allowt sufficient time to relocate the appellant's business. Time is said to be neededt to find an alternative site, secure planning permission on it and move thet business.t
- 27.tHowever, the appellant's evidence at the Hearing was that he would not in factt seek to relocate the business. The reasons given for this included the difficultyt of finding a site and the cost of doing so, particularly given the investment that has already taken place at the appeal site.t
- 28.tBut even if the businesses at the site did seek to relocate, I have no cleart justification for the 12 months sought. While I accept that relocation would bet no easy matter, in the absence of any evidence to show that it has beent considered to any significant extent I am unable to conclude that 12 months ist a more appropriate period than the 6 months specified by the notice.t Moreover, it is desirable that the breach of planning control is remedied withoutt unnecessary delay. Accordingly, the appeal on ground (g) fails.t
