| Q5. Which local sources of air pollution concern you the most – if other please specify |
| --- |
| Smoke and fumes from Launders Lane<br>Pollution from Ferry Lane<br>Stench from Rainham Sewage Station |
| Launders Lane Arnold Fields |
| Launders Lane |
| Contaminated land and fires arArnolds Field, Launders Lane, Rainham. |
| MOTO Hospitality plans to build two huge motorway service stations on the M25 at the boundary between Havering & Brentwood. Will affect air quality ivo number of vehicle capacity during construction and post development. During the proposed construction ohase up to 150 HGV movements per day will go through Harold Hill and Noak Hill |
| Neighbours are burning woods in the area during the winter, which heavy affects children, elderly and people with asthma. Burning woods for domestic heating should be banned, every time they burn, the PM 2.5 air detector in my home reach dangerous levels. |
| The toxins and fires from Arnold's field, Launders Lane |
| Waste burning and incineration and road traffic, cars, lorries, motorbikes all idling at the roundabout junction of South End Road and Wood Lane and directly outside R J Mitchell School |
| Geoengineering!!!<br>I am sick of the filth that falls from the skies due to this aerial spraying.<br>I regularly find deposits on my windows and doors, as well as in my garden.<br>American states are now banning, and even criminalising, this vile practice.<br>The considerations in your list are minor, compared to this insidious fraud. |
| Not sure I have selected correct box concerns living near the launders lane site for the last number of years toxic smoke coming from this site can not have windows open or sit in our garden during the summer this has now been declared a contaminated site which has an impact on our health and our house prices |
| Masses of fireworks that the mayor of London let's off every year. It's very hypercritical. He should be leading the way for cleaner air not blowing up enough toxins to make health worse. Quite like do as I say and not as I do |
| Chem trails |
| PM2.5 and other carcinogenic and dangerous airborne particulates emanating from ARNOLDS FIELD, LAUNDERS LANE, RAINHAM |
| The toxic fumes from Arnold's Field, Launders Lane. |
| Launder's Lane |
| We get wind bourne pollution from the frevailing south westerly winds. So a lot of this pollution comes from other london boroughs eg dagenham newham the city and south london boroughs! |
| Arnolds Field, Launders Lane |
| If the Gallows Corner flyover had been finished ontime with Costains working seven days per week or even 24/7 the flyover would be a whole lot nearer completion and we would not have the thousands of vehicles clogging up the side roads every day with idling engines, one of the worst forms of pollution.<br>TFL have a lot to answer for and with this level of overrun I hope they are making Costains pay for the delays as they should when a contract is signed with clauses that prevent this? |
| contaminated landfill site in Rainham called Arnolds Field in Launders Lane! |

| |
|---|
| None. We are bordered by the M25 and you aren't going to be able to change that. |
| The closure of Gallows corner has caused so much more vehicle pollution it makes this document laughable |
| In addition Road Traffic if Moto construction goes ahead |
| The proposals to develop two sites on the M25 for new services will increase the levels of HGV/motor vehicle traffic significantly in both Havering and Brentwood, during and after construction of these applications are approved. The increase in traffic will significantly affect air quality in the borough in my opinion, to the detriment to the residents and visitors alike. |
| The M25 and the construction / ongoing running of the proposed MOTO service station will be very bad for the whole area. |
| Restaurants around Gidea Park station. In particular Kervan Kitchen where the council seem to have no way of controlling or monitoring the excessive smoke that is visibly in the air and being left all over our cars and properties, plus must be filling our lungs. |
| During COVID there were NO SMOKING/INCLUDING VAPING signs in various public places. Particularly in pubs and clubs. I have been severely affected by people vaping in pubs/clubs. Even had to leave the premises due to the effect it had on my throat and breathing. WHY have these signs been removed from these public buildings. Last year I had to move 3 times with my partner in a pub where we were enjoying a social drink together. Moved from one area away from the people vaping, moved to another area and then two females came to the next table vaping and we had to leave. I dread going out for a social drink in case someone is vaping in these public/sociable venues. |
| Landers Lane. Rainham fires. toxic matter in tbe air and soil.<br>Why not start with this? |
| Extensive building work, lack of protection of green belt if the new m25 service stations are approved and forest is concreted over and the immense amounts of HGV traffic. |
| The proposal to build Moto service stations locally. This is extremely concerning to me - the local wildlife and countryside is the main reason I choose to live in the area, and the air quality is already concerning eith the Gallows roundabout closure and increased traffic in the area. I would strongly consider moving out of the area if these proposals were to go ahead. |
| I am very concerned about the proposed MOTO motorway services as this would have a dramatically effect on our air quality. |
| The fact that Moto wants to build service station that has (a) 850 car parking spaces, (b) 450 HGV parking spaces, (c) 22 towed-caravan parking spaces; (d) 20 motorbike parking spaces; and (e) the roads required to service them all, and it does that in the Green Belt and on Havering's border, it's bound to undermine Havering's Air Quality improvement plans. Havering Council are doing nothing to stop them building this within Their boundaries. |
| Moto wants to build a service station that will cater for:<br>(a) 850 car parking spaces, (b) 450 HGV parking spaces, (c) 22 towed-caravan parking spaces; (d) 20 motorbike parking spaces; and (e) the roads required to service them all, and it does that in the Green Belt and on Havering's border, it's bound to undermine Havering's Air Quality improvement plans. |
| All of the above however more specifically the pollutants emitted from Launders Lane |
| Aircraft. |
| We have heard Moto wants to builds a Service station that will cater for (a) 850 car parking spaces, (b) 450 HGV parking spaces, (c) 22 towed-caravan parking spaces; (d) 20 motorbike parking spaces; and (e) the roads required to service them all, and it does that in the Green Belt and on Havering's border, this is bound to undermine Havering's Air Quality improvement plans. Why would Havering allow this to happen ! |

| |
|---|
| Planning Application for Moto in the green belt |
| Launders lane is beyond a joke. Constantly catching fire and nobody cares. Yet if you drive an old car you get charged £12-50 because apparently this reduces pollution. It's just a scam for the poor to be taxed even more. Nobody in authority cares about pollution. It's all box ticking and an excuse to fleece people. |
| Mineral extraction. Why is this not listed or addressed in the AQAP, particularly given the existing and proposed extraction sites in the borough and its designation as a mineral provider under the London Plan? |
| The Launders Lane on going fires,from the illegally dumped rubbish that the council has allowed to happen |
| Launders lane |
| Smoke from Arnold’s Farm is revolting and burns in the throat. |
| IT DOESNT CONCERN ME , ITS A MONEY MAKING SCAM |
| Launders lane |
| N/A |
| The constant fires in Launders Lane, Rainham. Why is nothing done about this? |
